

Week 3 Resources

- [Accelerated modern human-induced species losses: Entering the sixth mass extinction](#) : a paper explaining the rise in extinction rates.
- [Biodiversity redistribution under climate change: Impacts on ecosystems and human well-being](#) : a paper about the impact of climate change.
- [Biodiversity - our strongest natural defense against climate change](#) : a report from the United Nations related to climate change.
- [A climate risk index for marine life](#) : a paper about climate change impacting virtually all marine life.
- [Tracking Amazon Deforestation from Above](#) : a website from the NASA's earth observatory with visuals and information about the amazon deforestation.
- [Sentinel-2 captures coral bleaching of Great Barrier Reef](#) : a website from ESA (the European Space Agency) explaining about the project Sentinel-2.
- [Google Earth Engine](#) : a website with zoomable video that allows to see how the earth has changed since 1984.
- [iNaturalist](#) : a website that helps identify the plants and animals around anyone, allowing people around the world to collect and contribute with this information.
- [Florida Wildlife Camera Trap Dataset](#) : a website from the University of Central Florida within its Center for Research in Computer Vision sharing dataset about Florida wildlife.
- [Measuring the biodiversity of microbial communities by flow cytometry](#) : a paper about methods in ecology.
- [Is Global Microbial Biodiversity Increasing, Decreasing, or Staying the Same?](#) : a paper from Frontiers in Ecology and Evolution.
- [Snapshot Safari: A large-scale collaborative to monitor Africa's remarkable biodiversity](#) : a paper from the South African journal of science.
